SEO Basics

Basic Angular

HTML/CSS Developer with 1.5 years of hands-on experience in a multi-brand iGaming environment. Day-to-day work spans implementing design updates from Figma, fixing UI bugs across 10+ brand codebases, code review, and version updates. Progressed from Trainee to Middle in 1.5 years. Previous 2-year background in geospatial data work sharpened attention to detail and working to strict specifications.

EXPERIENCE

Middle HTML/CSS Developer

Nov 2024 – Present

BrainRocket Ltd · Limassol, Cyprus

[Trainee](#) → [Junior](#) → [Middle](#)

- Maintain and update UI across 10+ brand codebases — bug fixes, design refreshes, and version updates
- Implement design changes from Figma against Jira tickets, ensuring consistency across responsive breakpoints
- Resolved cross-browser bugs including Safari rendering issues (icon flashing, incorrect image sizing) and scroll-lock behavior
- Review pull requests from teammates; suggest cleaner markup and SCSS solutions during reviews
- Share frontend tooling and Chrome DevTools debugging practices with QA to speed up issue triage
- Promoted Trainee → Junior (6 months) → Middle (+12 months) via internal skill matrix assessment

Geocoding Specialist

May 2019 – Jun 2021

Intetics

- Edited geospatial data for navigation maps — roads, traffic signs, and points of interest — using internal GIS tooling and SQL filters
- Reviewed teammates' submissions and applied corrections; logged edge cases for senior review (doubtlogs)
- Maintained accuracy standards under internal quality inspection (QIL) process
- Tracked tasks in Jira; documented processes via Confluence and SharePoint
- Collaborated with international teams across calls and async workflows
